Thank you.

Rafa and James should make sure that HQI has everything to complete its review.

Rob,

We will be able to provide comments on the technical memo after Easter (week of April 1).

However, we are still reviewing and running your model and need additional files to complete our review of the model. Your submittal included the sediment transport calibration inputs but we need the long term forecast simulation files (inputs and outputs).

Please send us the following:

- inputs and outputs for the projection runs including active remediation (at a minimum, MNR, dredging and capping/dredging)
- linkage files and programs to the simplified Organic Carbon and Contaminant Fate and Transport Model

Thank you, let me know if you have any questions,

eugenia

Subject: CPG Sediment Transport Technical Memorandum

Eugenia and Stephanie:

As we discussed during the Feb 28 Modeling before a date is established for the next collaboration meeting; could EPA tell the CPG when it expects to provide substantive detailed comments on the CPG's sediment transport model? So we can establish date that allows the CPG to review and address EPA's comments and also allow for Han Winterwerp to schedule time for the meeting.

Please let me know at your earliest opportunity.

Thank you.

R/

Rob
